Aug. 3, 1979

Dear Lowell  
RE: name Blocher  
suggest you write Lee Small  
Box 4426  
APO NY 09009

if you have not. I do not know how much she has, but it is  
in the INDIANA familys.

RE Bollinger

I believe the information I sent give  
Abraham Bollinger born Feb. 11, 1750 *d - Sept 29, 1811*  
this is from the Mennonite Research Journal Vol. VII #2 page 26  
I realize Egle had given Feb. 11, 1756 in one of his releases. But this  
is probably a typographical Err.  
I sometime hope to get into the Boston area--and check this  
Fracturschrift for myself.

RE: FRANTZ CONECTIONS.

Jacob to be specific. and yours at that/  
He will not be a son of Balster, but may be a grandson  
thru the son John (Hanes the eldest) who married Catherine  
and died 1787 estate or will provern 2-19-1878  
with a son Jacob born 9-25-1753 died 5-14-1799  
and married Barbara Hochstetter

while on this Hochstetter name

John Frantz this line is also supposed to have married  
Elizabeth Hochstetter

then note that the researcher on Michael II claim this name for the  
eldest son also a JOHN. Some one has to be at error  
I think this JOHN Hochstetter to be in this family.

The same is being done to MICHAEL coming thru VA--  
So I am beggining to question lots on previous work.

This may help you to make more honest evaluations.

I might add the MOHLER family in Miami County OHIO are descended from  
Rudolph Bollinger--, thru his<sup>g</sup>daughter Maria that married

Jacob Mohler and was the grandparents of Rudolph Mohler born 1801 PA  
died 1880 age 80 and buried in the Sugar Grove CEM--  
Miami Co. OH. To OHIO in 1840.

source: :Roots by the River: Old German Baptist by Marcus Wallace.

*2 different  
names - 1 Date  
To same father.*

RE:FRANTZ

I have found no reason to not accept the  
Ann 1779-1836 who md John Wertz 1767-1862  
as the dau/of Christian 1743-1824 in the Matthias Book.

I will admit I think of you and your problem everytime  
I find reason to review any of my files.

And assure you will send you the answer if and when I might  
find it.

At least my filing system==help to see the discrepansys.  
And I am probbely making some enamy's along the way.  
I stand for truth, not expediency in this bussness.  
Yes tis slower, but far more rewarding. and I can live with  
myself.

I also believe others will thank me in the longrun. For maybe  
there will be progress instead of confusion.

Thanks for answering.

Sincererly and good louck with those wee ones out there.

Rosemary

*Rosemary*

The nammm Brubaker--is slow at the moment.  
so collect, at this moment I have not heard of a serious  
researcher into Germany, and I do believe this will be necessary.
